

You will need the WA Graduation Resource Kit with the Water Ambassador royal blue ribbons and pins in it.

Today is our final day. It has been a lot of fun sharing the secrets of water with all of you.. I hope you have had fun learning these secrets

Well today we have a special presentation for each of you – we are so proud of all of you!

Before we do that lets just review what we have done over the past few weeks. Take 5 – 10 minutes discussing the posters and dinosaurs .. And answering any questions.

When we talk about dinosaurs – what sort of water did they drink?

Lets look at our water posters.. Get the children involved again. Look at each of the posters.. And go through each one

Graduation Day

Review our seed experiments

- *What have you noticed?*
- *What do we do next?*
- *What have we learned so far about water and YOU?*
- *Hydrated – Healthy Water Habits 123*
- *Water Crystals and YOU.. Feelings happy & sad words*

Week 4 Presentation V2

zazen Water Ambassador Program
www.waterambassador.com

2

Review – water habits in the classroom – pay special attention to this..

How are you all doing with the daily water habits 1 2 3

How are the water monitors doing each day

What questions do you have?

Are you enjoying drinking your special water in the classroom.

When do you know you need to drink more water when you feel..
Tired, sleepy, headache, thirsty, .. Reinforce

What do our seeds look like now?

What and how much I drink can make a difference to how I feel, grow and learn!

Week 4 Presentation V2

3

Lets look at our Seed Experiment.. Not all water is the same. You should have some pictures from when you started to compare to today..

- What happened.. Are there any visible differences?

Has the zazen watered seeds grown greener and more lush than the others.. Looking healthier and more alive.

What this experiment shows us is that Living Water with minerals in it and the energy from the sun and earth – can make a difference to how a plant grows and looks and feels!

So that can also happen to you and me – as we are like the plant a living growing thing.

- So its important that you keep drinking plenty of water.. And following our Health Water Habits 123 All day every day!

•What and how much I drink can make a difference to how I feel, grow and learn!

Water is so important for ALL of us to continue to grow and be happy.

**YOU are Mostly Water...
Being Grateful**

Human Body
72%
water

Love and Thanks

Week 4 Presentation V2

zazen Water Ambassador Program
www.waterambassador.com

Remember we are mostly water.. And we know now that water has energy.. It can be beautiful or not so depending on the words its exposed to.

We now know that the words we use make a difference to our own energy and attitude.. Isn't that just amazing! We saw all these beautiful water crystals.

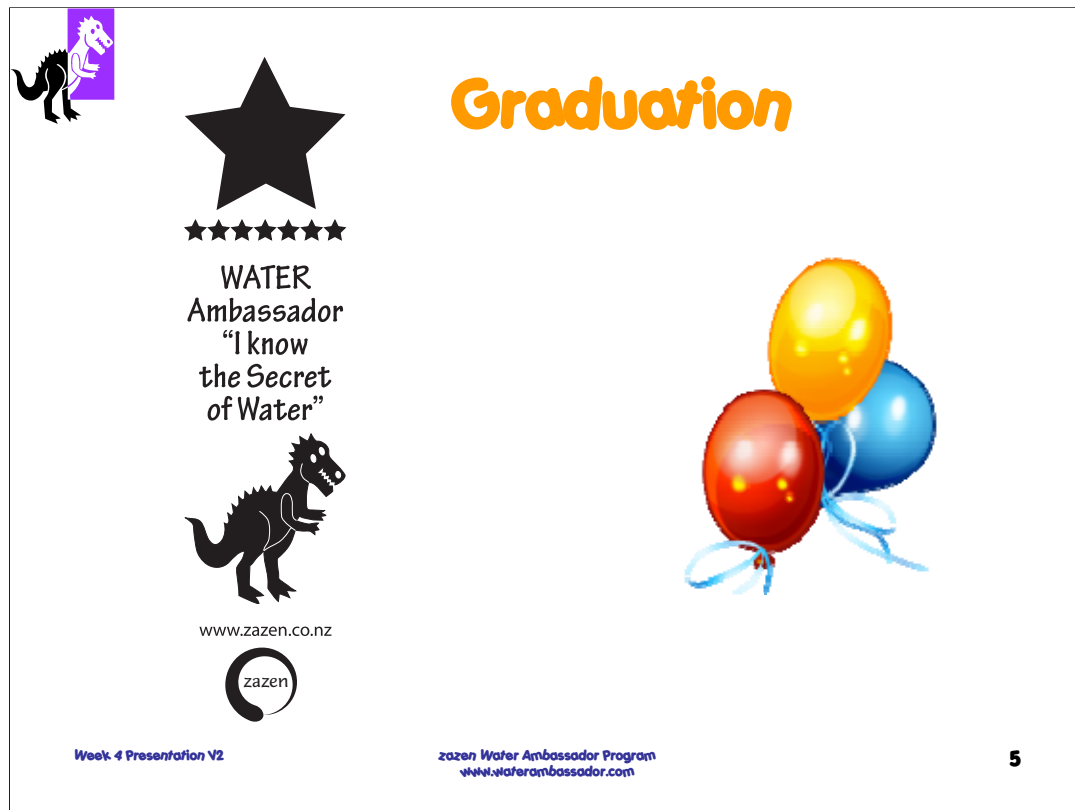

Who remembers What sort of music does water like??

Does anyone remember what Grateful means??

Grateful means – a feeling of being thankful

So we made beautiful water Gratitude coasters to sit our water on all day long.. Lets look at some..

Take some pictures.. After the graduation.

Have the children line up – and with the aid of a teacher..

Congratulate the class and tell them they have a special job to do as Water Ambassadors. What does an ambassador do? They are like a very special representative – now they each can share their knowledge about water and hydration with others..

Now invite each child to step forward one after the other..

Shake their hand.. Looking them in the eyes and at their level (height).. say

“Congratulations..<name> You are now a Water Ambassador and know the secret of water.. Well done and thank you“

Hand the ribbon and the Pin to them.. And get the teacher to help them pin it on do the next until everyone is done (leave ribbons for those that are absent)

When you have finished – take a class photo – one with you in it.. With them all and their ribbons.

Thank the children for having you in the classroom and promise to visit again
