

# zazen Essential Water Range

## Alkalinity and Anti-Oxidant Enhancer

### Enhance the Alkalinity and Anti-Oxidant (ORP) Quality of Your Water

This product increases water Alkalinity and mineral content by releasing additional essential minerals. It also enhances the Anti-Oxidant properties of your drinking water by reducing the ORP (Oxidation Reduction Potential), which further enhances the bioavailability of your water.

### Key Benefits

- Increases FIR (Vibration energy of the water) which is said to assist with:
  - Blood Purification
  - Inhibit harmful Metal Ions
  - Promotes Growth & Improves Living Bodily Functions
  - Obtain regeneration ability
- ORP ↓ (-50mV to -200mV)
  - Lowering the ORP of water aids in neutralizing free radicals (an antioxidant effect).
- Increases pH by releasing additional ionized Calcium and Magnesium.

## Comparison Charts for pH (Alkalinity) and ORP below.

### pH Alkalinity Comparison Chart

Depending on your source water the pH of your drinking water will vary. The benefit of adding zazen Alkalinity & Antioxidant Enhance to your zazen Water is an increase in the pH by 1 – 2 points

pH 3 – 5	Soft drinks, cigarettes, meat
pH 6 – 6.4	Some tap water, RO* water
pH 7.0	NEUTRAL
pH 7.369	Human Blood
pH 7.2 – 8.0	zazen Essential Water
pH 14	NaOH (caustic soda)

### The pH Scale

### ORP Water Comparison Chart

Water Type	ORP Reading
Reverse Osmosis Water	+200 to +300
Bottled Mineral Water	+100 to +200
Tap Water	+250 to +400
Body Water	-150 to - 350
<b>zazen Essential Water with pH Antioxidant Enhancer</b>	<b>- 90 to - 300</b>
Vegetables	+50 to - 90
<b>Organic Vegetables</b>	<b>-90 to -150</b>

**ORP** – Oxidation Reduction Potential enhances the bioavailability of your water & increases the antioxidant effect.
